

10. Electronic photo-optical system for surveying, digitalizing and reproducing the external surface of a three-dimensional object, either virtually or in plastic, composite or papery material.

5

ABSTRACT

The acquisition and reproduction units of the system are interconnected by means of a network in order to survey and regenerate the outline of any kind of object and to reproduced it either virtually in a CAD 3D system or materially in plastic, composite or
10 papery material.
